

Improve Workflow Visibility

The Task Management Portal streamlines and automates the task management process in once centralized location which helps organizations to:

- Identify service gaps
- Recognize training deficiencies for personnel
- React to guidance notifications
- Increase response rates between organization modules

Improve Operational Efficiency

Effective task management is integral to a productive organization. The Task Management Portal allows users to create, assign, and manage tasks in a centralized location which enables them to:

- Maintain quality assurance over roles and responsibilities
- Allocate information quickly and confidently
- Create and distribute reports

Streamline Data Identification & Retrieval Process

Task Management Portal provides an end-to-end solution for managing tasks, progress, and the pertinent information for each task. As a result, organizations are able to:

- More effectively identify, automate, and retrieve key data
- Generate reports and analysis more efficiency
- Document KPI's, analyze trends, and leverage reports to drive confident decision making

Enhance Guidance Submissions & Policy Deployment Processes

Task Management Portal provides a dashboard that helps organizations to:

- Publish policy and guidance information
- Streamline suggestion tracking
- Centralize the request submission processes for customers
